

COMPLETED CONTRACT

Site and Location: The Redevelopment of Heuston Station, Dublin City Centre.

This project included the rebuilding of the main concourse, platforms 1 to 10, the ticket offices, toilets and other support buildings such as the Fastrack cargo facility. The existing Heuston Station building is a protected structure which required that all upgrading of the existing historic structure to facilitate the renovations to the ticket office, toilets and the M&E upgrade to the station, be sympathetic.

The external works to the car parks and access road were also carried out as part of the project. This entailed road realignments, modification to kerbs, ramps & steps, new car parks, access and egress ramps & stairs, new stone cladding masonry walls, new reinforced concrete retaining walls and fencing.
