

COMPLETED CONTRACT

Site and Location: 2 Tier Loading Ramps, Rosslare Harbour, Co. Wexford.

This project consisted of the construction of a 2 tier ramp and all associated civil engineering works for the roll-on roll-off ferry service at Rosslare Harbour in Co. Wexford.

Initial enabling works such as, dilapidation surveys, demolition, hard standings, foundations, drainage, and railings were also undertaken as part of the contract. Detailed traffic and pedestrian management plans were also required.

Much of the work was carried out in tidal conditions and the ferry services were kept open throughout construction operations.

At the final stages of the contract street lighting, surfacing, white lining and traffic control barriers were erected.
