

COMPLETED CONTRACT

Site and Location: RPA, Charlemont Bridge, Dublin City Centre.

This project involved the construction of a significant new Multi Span Luas Bridge (48m long) crossing two live roads and the Grand Canal which carries the LUAS light rail system.

The bridge spans one of the busiest roads in the country which required close co-operation with the local authorities, Gardai, utilities and employers representatives to produce a workable solution to the many challenges encountered.

CLG worked closely with the designers to produce a revised design reducing the disruptive impact to the construction process and completing the works ahead of schedule.

Project Details

DATE

November 02 – February 04

CLIENT

The Railway Procurement Agency

VALUE

€2.35m

ARCHITECT

The Railway Procurement Agency

CLG'S ROLE

Main Contractor & PSCS
