

## COMPLETED CONTRACT

**Site and Location:** Mardyke Walk, Cork.

This project entailed the upgrading and restoration of a large section of roadway and footways spanning 1.3km including services diversions and installations.

The refurbishment works to Mardyke Walk and Ferry Walk were all carried out in a tight and busy city centre location. The carriage-way remained open at all times to all vehicular and pedestrian traffic and access was maintained for all occupied houses and businesses throughout the project duration.

The Construction of roads and footpaths including road drainage, speed tables & road markings, was followed by new hard and soft landscaping which included new boundary treatments, reconstruction of boundary walls and surface finishes.
